Contact

📅 38 years old

🇲🇽 Mexican

I've been working in sales for almost half my life, but once I wrote my first 'Hello World' I fell in love with coding...

Right now I'm looking for my first work as a dev...

Education

Since Sept. 2020 **Front-end / Backend**

[Platzi](#) México, CDMX

I'm still studying at Platzi because I want to become a software dev.

July 2020 **Typescript**

[Udemy](#) México, CDMX

I acquired Typescript knowledge from the basics to the toughest concepts

From Apr. 2020 **Javascript**

to May 2020 [Udemy](#) México, CDMX

Javascript is essential to understand web development, for me it is a must. Work with this language is work in almost all places. I was able to learn not only for VanillaJS but also from NodeJS, Angular, Vue, React, Next, Ionic, MongoDB and many more...

Work experience

Since Sept. 2020 **Web developer**

México, CDMX

I am looking for my first job as a developer... I worked almost half of my life in sales, about 15 years to my actual 38 years.

I have experience in managing sales teams of 4-12 members, staff training, customer service and expertise in the field of retail credit.

Computer skills

CSS3

Grid layout, flex integration, animations

HTML

Semantic integration

Javascript

From ES6 good practices, clean code, data structures, prototypes, closures, scopes, hoisting, EventLoop, promises, browser API, DOM manipulation

Typescript

Classes, types, Interfaces, generics, decorators, modules. Integration with vanillaJS, angular and react projects
